

EDUCATIONAL FACILITIES SERVICES

EFFICIENCY - INTEGRITY - PROFICIENCY
discover the Sleighter difference...

Educational Facilities Services

Sleighter Engineering, Inc. has been providing civil engineering and design services to school districts for 13 years, and has completed work for over \$100,000,000 in school projects. We navigate the approval processes for school districts providing a seamless system of project delivery. We also offer construction support, program management, construction inspection and management services. We delivered one of the lowest per square foot costs in the state as Construction Managers on an \$11,000,000 middle school project. Our educational clients and architects appreciate the efficiency of our services and delivery of successful projects.
